

# **ONLINE MOVIE TICKET BOOKING SYSTEM**

Going to cinemas has been the culture of almost all the families of today's generation. It is a time when the family can spend some time altogether by stealing some hours from their busy schedule. Cinemas help in contributing in our daily memories as they provide an essential part of our culture. Many people choose to conduct booking online because of the convenience.

This project developed with the aim of helping customers to book movie tickets online. This project saves a lot of time and reduces the time of the customer. There is no need to go to the movie theaters and wait for your turn to book movie tickets. With the help of the system, users can book tickets from anywhere at any time(24x7). Using Interactive GUI anyone can quickly learn to use the complete system.

Some features provided to the users are new registration, login page, see movie by category, compare ticket by price and timing, customer can book ticket without registration but if he/she registers then he/she will get different types of special offers, e-news letters, movie updates and lots more. The user can also cancel or update their order. Users can also order food and beverages while enjoying their movies.
